

CloudCharge Go

CloudCharge Go is our response to the Alternative Fuels Infrastructure Regulation (AFIR) – making public charging of electric vehicles easier and more accessible than ever before. With CloudCharge Go, users can charge without downloading an app or creating an account. Just scan, pay, and charge – directly in the browser.

No app. No account. Just charge.

- Charge via your mobile browser – no app needed
- No registration, phone number, or email required
- Want a receipt? Just enter your email address
- One QR code for everyone – works equally well with or without an app
- Prices are synchronized with the portal settings to ensure consistency

How to get started

- 1 Create CloudCharge account**
Activate your CloudCharge subscription and take control of your chargers.
- 2 Create Stripe account**
Stripe enables safe and seamless money flow.
- 3 Activate CloudCharge Go in the Portal**
Just sign in to your account and activate easier payments.
- 4 QR code and operator logo will appear automatically to charger's display.**
If you have charger without display, just add sticker with QR code.
- 5 Charger is ready to use!**
Just scan, pay and charge!

Price month/chargepoint

5.9 €*

+ Transaction fee 11 %
*excl VAT
