

Easy charging on the go!

There are 2 ways to pay with a public chargers connected to CloudCharge: CloudCharge app or CloudCharge Go. CloudCharge app is connected to your payment card. CloudCharge Go enables charging without registrations; just scan QR code, pay online and start charging!

CloudCharge app - Find a charger

Public chargers connected to CloudCharge network can be found under **Public Chargers** on your CloudCharge app. Read more here on [how to create a CloudCharge account](#).

Tap the compass symbol to show your current location and find chargers near you.

1

Select Charger Location

Select a pin on the map to see a list of chargers near you. You can view available chargers, their max power and price.

2

Select outlet

Select the outlet you want to charge at.

3

Select Payment Method

The first time you must register a payment card. Follow the instructions in the app.

4

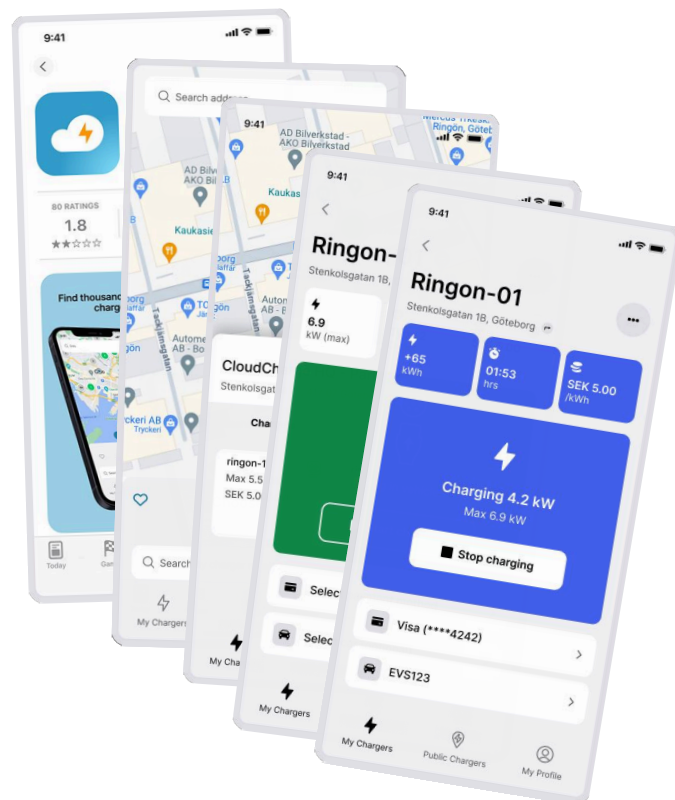

Plug in Cable and Start Charging

Plug the charging cable into your vehicle and tap Start Charging. Wait for your vehicle to start charging.

5

Stop Charging

To stop charging, you can either unplug the cable from your vehicle or tap Stop Charging in the app. You can always find your active charging session by tapping the pulsing battery icon on the Public Chargers map.

CloudCharge Go

No app. No account. Just charge.

With [CloudCharge Go](#) users can charge without app or creating account.

Charge using an RFID key

With an RFID key you can easily start a charging session by holding the key up to the charger. [Read more](#)

Download CloudCharge app on [Google Play](#) or [App store](#)
